Volume Contents

NUMBER 1

Antoni Olivé — 1 — A formal approach to timing analysis and design of information systems

Morton M. Astrahan, Mario Schkolnick and **Kyu-Young Whang** — 11 — Approximating the number of unique values of an attribute without sorting

Zbigniew Michalewicz — 17 — Functional dependencies and their connection with security of statistical databases

Suranjan De, ShuhShen Pan and **Andrew Whinston** — 29 — Temporal semantics and natural language processing in a decision support system

B. C. Desai, P. Goyal and **F. Sadri** — 49 — Non-first normal form universal relations: an application to information retrieval systems

Krithivasan Ramamritham — 57 — Verification of resource controller processes

Kazimierz Subieta — 69 — Denotational semantics of query languages

Theo Härder and **Erwin Petry** — 83 — Evaluation of a multiple version scheme for concurrency control

Mark A. Roth, Henry F. Korth and **Don S. Batory** — 99 — SQL/NF: a query language for ¬1NF relational databases

James R. Driscoll, Sheau-Dong Lang and **Stephen M. Bratman** — 115 — Achieving minimum height for block split tree structured files

I — News Section

V — Software Survey Section

NUMBER 2

Oscar Barros — 125 — Information requirements and alternatives in information system design

Udo Kelter — 137 — Concurrency control for design objects with versions in CAD databases

Fereidoon Sadri — 145 — Multi-relation dependencies

Friedrich Gebhardt — 151 — Text signatures by superimposed coding of letter triplets and quadruplets

Bengt G. Lundberg 157 CONST—A constructive approach to information modelling

Edward P. F. Chan and **Alberto O. Mendelzon** 167 On testing soundness of relational expressions

F. Dehne and **H. Noltemeier** 171 Voronoi trees and clustering problems

Brad T. Vander Zanden, Howard M. Taylor and **Dina Bitton** 177 A general framework for computing block accesses

Sang Hyuk Son 191 Synchronization of replicated data in distributed systems

Dalia Motzkin 203 The design of optimal access paths for relational databases

B. C. Desai, P. Goyal and **F. Sadri** 215 Fact structure and its application to updates in relational databases

223 Reports and Theses

I News Section

III Software Survey Section

NUMBER 3

Takao Miura, Kunihiko Moriya and **Hiroshi Arisawa** 229 On the irreducible non first normal form relations

Pankaj Goyal 239 Duplicate record identification in bibliographic databases

Roberto R. Kampfner 243 A hierarchical model of organizational control for the analysis of information systems requirements

Udo W. Lipeck and **Gunter Saake** 255 Monitoring dynamic integrity constraints based on temporal logic

M. Zaki and **R. Salama** 271 Linkage versus integration for binding database and interactive graphics systems

Leo Mark 281 Defining views in the Binary Relationship Model

Barbara Di Eugenio 295 Cooperative behaviour in the FIDO system

David Maier, David Rozenshtein, Sharon Salveter, Jacob Stein and **David S. Warren** 317 PIQUE: a relational query language without relations

337 Reports and Theses

I News Section

V Software Survey Section

NUMBER 4

Isamu Kobayashi	343	Tuple calculus: formal definition and conversion from first-order calculus
Kurt-Ulrich Witt	353	An architecture for processing graph-grammar applications
Charles X. Durand	363	Forward multidimensional search with application to information retrieval systems
Leonardo Felician and **Alessandra Gentili**	371	A nearly optimal Huffman technique in the microcomputer environment
Caroline M. Eastman	375	Optimal bucket size for multiattribute retrieval in partitioned files
Leonardo Felician	385	Linked hashing: an improvement of open addressing techniques for large secondary storage files
	391	Reports and Theses
	I	News Section
	III	Software Survey Section
